12-month Enrollment Overview

The 12-Month Enrollment component collects unduplicated student enrollment counts and instructional activity data for an entire 12-month period. Using the instructional activity data reported, a full-time equivalent (FTE) student enrollment at the undergraduate and graduate level is estimated. NCES uses the FTE enrollment to produce indicators such as expenses by function per FTE as reported in the IPEDS Data Feedback Report.

Data Reporting Reminders:

- Institutions are now required to use the new postbaccalaureate degree categories (eliminating the first-professional category and reclassifying those programs).

In part A, all postbaccalaureate students are to be reported as graduate students, including any Doctor's - professional practice students (formerly first-professional). In Part B, all postbaccalaureate instructional activity is to be reported as graduate level activity, including any Doctor's - professional practice activity (formerly first-professional). Instructional activity data reported in Part B will be used to calculate your institution's total FTE students.

- Report an alternate FTE, when appropriate. If you have correctly reported your credit and/or contact hour data and the system calculated FTE estimates are not reasonable for your institution, you have the opportunity to enter more accurate FTE data for your institution. This option should be used ONLY if the system calculated estimates are not reasonable and your alternate calculation method should be clearly detailed if an edit is received.
